

# Huawei inverter off-grid operation

## Overview

---

How do Huawei hybrid inverters work?

Huawei hybrid inverters have four modes of operation: This setting allows as much of the locally generated energy as possible to be used locally, which is the main reason why hybrid systems are created. In this case, if we have surplus production, the system will charge the batteries as long as it can.

How do I get Off grid mode to work with a backupbox?

To get off grid mode to work with a BackupBox. Solution: Buy a LUNA ESS Battery and attach it to the M1 inverter ! Got it - so i should install energy storage. Is there any cheaper alternatives for LUNA that will work in my case (compatible with SUN2000-6KTL-M1)?

LUNA is 'THE' battery for Huawei inverters.

How do I set the grid code for off-grid operation?

In off-grid mode, you need to set the grid code (Island-Grid) for off-grid operation on the Quick setting screen. Figure 4-16 Setting the grid code (Island-Grid) for off-grid operation If the mains is unavailable, you need to set the grid code for off-grid operation. In off-grid mode, the ESS must be configured.

Is Huawei a good choice for a hybrid PV system?

Nowadays, Huawei has become almost inescapable in this industry. With the development of technology and the spread of PV, hybrid systems have become increasingly important. In this article, we look at Huawei's solutions for hybrid systems. Single-phase products range from 2 to 6 kW. For this size class, they has 2 MPPTs as usual.
