

Huawei solar container outdoor power 5 kWh safe and portable

Overview

What is Huawei luna2000 battery storage system?

Huawei introduces its own PV battery storage system: LUNA2000. The Huawei LUNA2000 storage system has a scalable, modular design. A system consists of a power module and one or more battery modules. A battery module has a capacity of 5kWh and a discharge capacity of 2,5kWh.

What are the advantages of Huawei luna2000-5-e0 5 kWh battery?

One of the main advantages from the battery Huawei LUNA2000-5-E0 5 kWh and yours modular architecture. That is, it is possible to expand its capacity up to 30 kWh, using up to 6 modules of 5 kWh each. In this way, the user can scale the system according to their needs, ensuring greater customization and energy efficiency.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 kWh up to 15 kWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

Which batteries are compatible with Huawei inverters?

The LUNA2000 battery module is compatible with single and three phase Huawei inverters. In one solar panel installation two batteries can be installed parallel. This makes a maximum storage capacity of 30kWh per inverter possible. LUNA2000 batteries are safe and reliable thanks to the lithium iron phosphate (LFP) battery cells.
