

Hybrid power inverter factory in Chicago

Overview

Who makes power inverters?

EPC Power is the only manufacturer in North America producing grid-scale power inverters. A power inverter is a device that converts electricity between AC (Alternating Current) and DC (Direct Current). AC electricity is the type that powers our homes through power lines, while DC electricity is commonly supplied by batteries.

How many companies are involved in inverter production?

Companies involved in Inverter production, a key component of solar systems. 1,393 Inverter manufacturers are listed below. List of Inverter manufacturers. A complete list of component companies involved in Inverter production.

What are EPC power inverters used for?

EPC Power inverters are utilized in various applications, with the primary uses in solar and large-scale battery storage facilities. These facilities store excess electricity generated by solar panels during the day and provide power at night when solar panels are not generating energy.

Who is EPC power?

We design, manufacture, and deliver US-made inverters around the world - empowering people and their operations toward a brighter, more sustainable future. EPC Power has become a leader in high-power conversion for energy storage, solar, data centers and beyond. We're American-made, with every product designed and manufactured here in the USA.
