

Is it safe to put the generator in a container

Overview

Can a generator be stored outside?

Here are a few things to consider when storing a generator outside: Even though generators can operate in various weather conditions, it is still important to protect them from the elements when not in use. You can store your generator under a waterproof cover or in a shed that provides adequate ventilation.

Where to store a portable generator?

When storing a portable generator, it is important to choose a location that is safe and dry to prevent damage to the generator and it is ready for use when needed. Here are some tips on where to store a portable generator. The best place to store a portable generator is indoors, such as in a garage, shed, or basement.

Does a generator need long-term storage?

Unlike the short-term solution, long-term storage of a generator can become a little trickier. The most important factor when it comes to the effective operation of any generator is how long the fuel has been in the tank. The longer that fuel has been resting in a generator's tank then the more likely it is to have trouble and clog.

Can you transport a generator inside a car?

It's not recommended to transport a generator inside a car due to fuel fumes and the risk of spills. Cargo carriers or utility trailers are safer options. If you have to transport a generator inside of a vehicle make sure it is in a separate trunk. Can you lay a generator on its side?
