

Kampala solar Energy Storage Fire Extinguishing Manufacturer

Overview

Who are Solarfire systems?

SolarFire Systems are National Security Inspectorate (NSI) Silver and BS EN ISO 9001/ BS EN ISO 14001/ accredited. We are also BAFE Accredited and members of the Fire Industry Association. All our approved gas extinguishing systems meet European and British standards as well as the exacting requirements of insurers.

What is a specialised fire suppression system?

Specialised Fire Suppression Systems: In the event of a fire, swift and effective suppression is crucial to containing the spread and minimising damage. SolarFire Systems offers specialised fire suppression solutions designed specifically for battery energy storage systems and electrical rooms.

How to protect solar energy installations from fires?

Implementing comprehensive fire safety measures, such as proper installation practices, regular inspections, fire detection and suppression systems, and emergency response plans, is essential to minimize the risk of fires and ensure the safe and reliable operation of solar energy installations.

How can a solar farm prevent a fire?

Through a combination of smoke detection, and intelligent algorithms, our systems can pinpoint abnormalities before they escalate into full-blown fires. By providing early warning alerts, we empower solar farm operators to take proactive measures, minimising the risk of damage and downtime.
