

Kuala Lumpur Portable Power Bank Communication BESS

Overview

Are battery energy storage systems a keystone in Malaysia's Energy Transformation Story?

Battery energy storage systems (BESS), once relegated to the margins of policy discussions, are fast becoming a keystone in Malaysia's energy transformation story. As solar and other renewables take up greater shares of the generation mix, the national grid's growing complexity demands a reliable backbone, a role BESS is beginning to fulfil.

Can Malaysia emerge as a key player in the Bess industry?

With supportive policies and rich renewable resources, Malaysia can emerge as a significant player in the BESS industry. A central pillar of MyRER's post-2025 strategy involves prioritising cost-effective energy storage solutions, including battery storage.

What are the benefits of Bess in Malaysia?

The transformative power of BESS in Malaysia extends beyond environmental benefits. It catalyses advancements in smart grid technology and energy management systems, promoting efficient energy usage and emissions reduction.

What is Malaysia's first sodium-sulfur battery energy storage system?

In a pioneering project, we installed and commissioned Malaysia's first Sodium-Sulfur (NaS) Battery Energy Storage System (1.45MWh) at the LSE II Large Scale Solar farm in Bukit Selambau, Kedah. This project serves as a national reference point for future large-scale standalone battery deployments.
