

# Laayoune Flywheel Energy Storage Industry

## Overview

---

What is the market share of Flywheel energy storage in 2025?

Utility will dominate with a 46.8% market share in 2025. The flywheel energy storage market is projected to reach USD 1.3 billion in 2025 and expand to USD 2.0 billion by 2035, advancing at a CAGR of 4.2 % during this period.

Are flywheel energy storage systems a good choice?

Li-ion and lead-acid batteries are the most commonly used energy storage systems here. However, advantages of flywheel energy storage systems such as higher efficiency and longer life are projected to increase the demand for flywheel energy storage systems, within the country.

Which countries use flywheel energy storage?

Some of the major automobile manufacturers such as Volkswagen, Mercedes Benz, and Porsche are headquartered in this country. Thus, the growing automobile industry is one of the biggest drivers of the flywheel energy storage market in Germany. The UK is committed in making use of renewable sources for energy storage.

What are flywheels used for?

Flywheels are used as intermediate energy storage systems for transport applications such as automobiles. Flywheel storage energy systems are more commonly used in Formula 1 cars and hybrid vehicles. However, manufacturers such as Maruti Suzuki have adopted this technology for passenger vehicles also.
