

# **Large-scale power plant solar container energy storage system**

## Overview

---

What is solar power storage?

Strictly speaking, solar power storage is not just a battery but a rechargeable solar battery. In case of strong solar radiation the generated solar energy exceeds the energy demand of the house. The excess energy is passed into the solar battery and charges it, like a battery.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Why do we need a large-scale battery storage system?

They ensure the stability of transmission lines and reduce energy costs through the use of photovoltaic energy and large-scale battery-storage systems in hybrid power generation systems. Large-scale storage solutions from SMA for a stable, flexible and efficient energy supply.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

## Large-scale power plant solar container energy storage system
