## Overview

---

In 2020, Tesla pioneered the development and production of the 4680 type (46mm in diameter and 80mm in height) large cylindrical battery, setting a new standard for the industry's transition to large cylindrical batteries. What is a cylindrical lithium ion battery?

Cylindrical lithium-ion battery cells are a type of rechargeable battery commonly used in a wide range of electronic devices, electric vehicles, and energy storage systems. They are characterized by their cylindrical shape, standardized sizes, and high energy density, making them versatile and suitable for various applications.

What is the smallest size lithium battery?

If we particularly talk about Ufine's small-size lithium batteries, they offer a range of compact lithium batteries. This includes their smallest size lithium battery - the 3.7V 300mAh lithium-ion battery. Although it comes in a small size, it is considered an act of punch as it provides reliable power for several low-power applications.

What is a large sized lithium battery?

So, large-sized batteries are designed using lithium chemistries so that their battery life and performance can be increased. Ufine is providing an extensive range of lithium batteries. These include the largest size lithium battery, i.e., 48V 100Ah LiFePO4 battery.

How are lithium ion batteries named?

Lithium-ion batteries are named based on their physical dimensions and shape. Smaller battery sizes are perfect for compact gadgets, while larger ones are better for energy storage solutions. Familiarity with battery sizes ensures the right match for every application. Lithium-ion batteries have three main types: cylindrical, prismatic, and pouch.
