

# **Lilongwe s first batch of 5G solar container communication stations**

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What are some facts and figures about China's 5G development?

Here are some notable facts and figures about the country's 5G development. -- In April 2020, China Mobile established a 5G base station at an altitude of 6,500 meters on Mount Qomolangma, which is the highest-altitude 5G base station in the world.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

How many 5G factories will China build in 2021-2025?

China aims to build 10,000 5G factories during the 14th Five-Year Plan period (2021-2025). -- In March 2024, China Mobile launched the world's first commercial 5G-A network in Hangzhou, capital city of east China's Zhejiang Province, with plans to expand to over 300 cities across China before the year-end.
