

Lithuania Emergency Energy Storage Power Supply

Overview

What is Lithuania's electricity storage project?

The electricity storage project will guarantee security and stability of energy supply in Lithuania. It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid.

Why should Lithuania invest in batteries?

It will also enable Lithuania to disconnect from the Russian controlled electricity grid and synchronize with the continental European electricity grid. In case of accidents, batteries will provide instantaneous electricity reserve service in less than one second. In the future, batteries will help to integrate renewable energy sources.

What is Lithuania's energy strategy?

The Strategy has 4 main objectives – to ensure a secure and reliable supply of energy to all consumers, to achieve 100% climate-neutral energy for Lithuania and the region, to transition to an electricity economy and develop a high value-added energy industry, as well as to ensure the accessibility of energy resources for consumers.

How much electricity does Lithuania generate?

According to Litgrid's (Lithuania's electricity transmission system operator) preliminary data, in the first half of the year 2024, the national electricity generation amounted to 3,783.4 GWh, of which RES accounted for 2,990.1 GWh.
