

# **London Solar Storage Container 20MWh Procurement Contract**

## Overview

---

Can a solar farm connect to the London Underground?

Transport for London (TfL) is seeking a delivery partner to work collaboratively to develop purpose-built solar farms to connect to the London Underground network, with opportunities for a broader connection to TfL's estate. Bidders are invited to participate in a competitive tender, which opens from 31 October.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

How many MW of energy storage will the US have in 2021?

As a result, the amount of storage installations in the United States is expected to increase from 4,631 MW in 2021 to more than 27,000 MW by 2031, and the US energy storage industry has laid out plans for 100,000+ MW of installed capacity by the end of 2030.

How many MW of electricity will a solar project deliver?

Following the conclusion of this tender, the appointed delivery partner will design and deliver proposals for solar developments that could bring up to 64 megawatts (MW) of electricity to the network, which is approximately five per cent of the electricity needed to run the Tube network.
