

# Long-term cost of off-grid solar container

## Overview

---

What is the cost of an off-grid solar system?

An off-grid solar power system costs at least \$40,000 for a typical Australian home to provide almost the same convenience as being on-grid. Why so much?

.

How much does a grid tied solar system cost?

A 4.8 kW grid tied and roof mounted solar system is around \$13,500 installed. Grid-tied solar does not require batteries. Instead, the solar will overproduce on sunny days and the extra energy is exported to the grid.

What is an off-grid Solar System?

A typical off-grid solar system includes Once installed, it's self-sufficient. There's no backup from the grid, so you'll need to size everything right for your actual needs. Some want energy freedom. Others live far from the nearest utility line. Some want resilience during outages. Others just want to cut back on bills and impact.

Is off-grid solar right for You?

Environmental Advantages of Going Off-Grid Off-grid solar isn't cheap upfront, but it gives you full energy independence. No more rate hikes, no more outages. Just you and the system you built. Pairing that energy freedom with smart design—like multi-use furniture and efficient gear—makes off-grid living not just possible, but comfortable.
