

# Mobile Energy Storage Cabinet Procurement Plan

## Overview

---

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.

How many utility-scale storage installations are there in 2022?

While total 2022 installations have not yet been reported, utility-scale storage installations in the second quarter were the largest quarter on record with 1,170 MW installed, despite significant delays in the market.

How many MW of energy storage will the US have in 2021?

As a result, the amount of storage installations in the United States is expected to increase from 4,631 MW in 2021 to more than 27,000 MW by 2031, and the US energy storage industry has laid out plans for 100,000+ MW of installed capacity by the end of 2030.

What is a PPA for new energy storage resources?

Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith—including the costs of the required energy procured from the utility.
