

Mogadishu Solar PV Tile Installation

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How to install solar tiles?

Use stainless screws (supplied). Remember Hole 1 depending on the stringing layout. Remove the diagonal foam strip (not shown here) from the tile by the roof edge. Use white spirit if required. Ridge Tile Fitting: The way the solar tiles lap means that there is a significant step at the ridge.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

How do you install solar panels on a roof?

Use support bars on their sides. These are fixed to every second batten just above the support bars as shown. Use two screws to maximise the solar coverage. If the roof doesn't end on a whole tile then supply blank tiles for cutting. These may be cut with a woodworking saw, and mounting and replacing individual tiles. Use pliers to remove the 3
