

Moldova s new energy storage subsidy time

Overview

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

How can the EU support Moldova's renewable energy development?

The European Union should support renewable energies and increasing energy efficiency in Moldova to help the country reduce its dependence on Russian gas. In the short term, financial assistance could be provided to help Moldova purchase gas on international markets if needed. Long-term solutions also include speeding up interconnection with EU energy networks.

How will the EU support Moldova in 2025?

It has a two-fold objective of decoupling Moldova from the insecurities of Russian supply of energy and fully integrating it in the EU energy market. Under this strategy, overall support for the Republic of Moldova would account to €250 million for 2025, of which €100 million will be provided by the EU by mid-April.

What are Moldova's energy reforms?

Among other priorities, the instalment focused on energy sector reforms. Since 2022, Moldova's power system has been connected to the European continental electricity network. On 1 December 2024, the export capacity from the EU to Ukraine and Moldova was increased from 1.7 to 2.1 GW, including 315 MW for Moldova.
