

# **Namibia integrated solar container communication station distributed power generation**

## Overview

---

Should Namibia use solar energy?

With Namibia currently importing 61% of its energy from its neighbours and distributing it through a central national grid, the use of solar energy offers investors an opportunity to decentralize the electricity distribution network.

Who owns the electricity market in Namibia?

Traditionally, the Namibian electricity market has been dominated by the state-owned utility Namibia Power Corporation (Pty) Ltd., or NamPower for short. In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer.

What does NamPower do in the Namibian electricity market?

In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer. For some years now, the Namibian government has been attempting to liberalise the market with a view to creating.

Where does Namibia get its electricity from?

As a result, Namibia remains dependent on electricity imports from neighbouring countries, which met about 60% of total demand in 2020. The majority of electricity imports are sourced from South Africa.
