

New Zealand Auckland Energy Storage Power Station Planning Project

Overview

When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as “the single largest electricity generation site in New Zealand.” New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

What is New Zealand's First Utility-scale battery energy storage system?

New Zealand welcomed its first utility-scale battery energy storage system earlier this year. The 35 MW/35 MWh Rotohiko battery facility commenced operation with electricity distribution company WEL Networks in April, after completing testing and commissioning.

What is the NZ battery project?

The NZ Battery Project was set up in 2020 to explore possible renewable energy storage solutions for when our hydro lakes run low for long periods. A pumped hydro scheme at Lake Onslow was one of the options being explored. The Government stopped the Lake Onslow investigations in late 2023.

How will a new battery help New Zealand's electricity supply?

“As New Zealand’s electricity supply becomes more renewable and subject to weather, this battery will help smooth out fluctuations in supply, ensuring supply remains reliable and secure.” Genesis kicks off construction at Huntly Power Station for a 100 MW grid scale battery that will provide backup to the national grid. [Read more here.](#)
