

Oslo Communications Green Base Station Construction

Overview

Can Oslo make the construction industry more sustainable?

Here, we look at innovative city-led initiatives in Oslo, Norway's capital, showcasing its achievements in making the construction industry more sustainable. City officials from Madrid, London and Oslo convened in Norway's capital for three days of workshops focused on Project VISIBLE's pilots in October 2024. Source: Oslo Climate Agency.

How can Oslo support a broader transition to zero emissions?

Figure 1. Oslo's climate goals To support a broader transition to zero emissions across the entire construction and building sector by 2030, municipal entities must lead the way. Since 2019, when companies compete for public works, the city has awarded.

How is Oslo being shaped by its climate budget?

Photo by WRI. Quieter and cleaner construction sites are just one way the city is being shaped by its Climate Budget, which was created in 2016 by Oslo's Climate Agency after Norway signed the 2015 Paris Agreement to help limit global temperature rise well below 2 degrees C (3.6 degrees F).

Why is Oslo a green city?

Oslo's master plan guides the building of a greener, better city, focusing on improving urban transport, protecting nature and enhancing quality of life for everyone. The city has already cut greenhouse gas emissions by 28% since 2009, and emissions from municipal operations have been reduced by an impressive 86% since 2012.
