

Outdoor wireless base station solution

Overview

Why should you choose TP-Link outdoor wireless base station?

With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage. The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users.

What is a wireless base station?

With the help of the system, a wireless base station is an example of an access point that acts between a wireless node and with other wired PCs and peripherals. A device that is placed between network segments (or “subnets”) to ensure that traffic is properly routed between different subnets.

Are passive base station antennas transforming mobile networks?

Explore the latest white paper from ANDREW and dive deep into the cutting-edge innovations in passive base station antenna (BSA) design that are transforming mobile networks.

Does wbs510 work with TP-Link?

Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas. Where long- distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km *.
