

Panama Colon Uninterruptible Power Supply Production

Overview

What is Panama's power system like in 2017?

In 2017, Panama's power system had very large installed hydropower capacity (54% of total capacity) and substantial VRE capacity (45.3%). The generation breakdown was 64% renewable energy (36% run-of-river hydro, 18% reservoir hydro, 8% wind, 2% solar photovoltaics (PV)) and 36% thermal generation (29% oil and 7% coal).

What is the flextool engagement process for Panama?

The FlexTool engagement process for Panama started in October 2017, with a set of discussions during training on power grid studies with large shares of solar and wind.

Does Panama have a flextool?

Panama has taken part in power sector activities under the Clean Energy Corridor Central America (CECCA), for which it is a pilot country. Country experts expect to use the FlexTool in scenarios and studies by ETESA, CND and SNE.

Why are uninterruptible power supplies important?

Abstract: Businesses today invest large sums of money in their IT infrastructure, as well as the power required to keep it functioning. Uninterruptible power supplies (UPS) are an extremely important part of the electrical infrastructure where high levels of power quality and reliability are required.
