

Philippines Smart Solar Power System

Overview

What is solar power in the Philippines?

Solar power in the Philippines refers to the generation of electricity from solar energy. The Philippines is naturally rich in resources that generate renewable energies, and solar power has seen a rise in recognition in recent years as more and more regular consumers recognize the increasing benefits of switching to solar power instead of completely relying on the local power grids.

Are solar panels a sustainable source of electricity in the Philippines?

Through solar power providers, the Philippines have found ways to lower the cost of installing solar panels, making it a sustainable source of electricity for a broader number of homes and businesses. Since joining the worldwide call in finding alternative, sustainable sources of electricity, the Philippines have been working towards this goal.

Is there any solar power plant in the Philippines?

Right now the only operational solar power plant in the Philippines is the CEPALCO Cagayan de Oro Photovoltaic Power Plant which has a capacity of 1.1 MW. The current largest solar power plants that is under construction in the Philippines is the Surallah Photovoltaic Power Plant in South Cotabato.
