

Portable power bank 4000 watts

Overview

What is a portable magnetic charging power bank?

Portable wireless magnetic charging power bank wirelessly charges mobile devices (up to 18W) when plugged into a power source or as a 4000mAh battery pack.

What is a 4000 mAh power bank?

4000mAh Power Banks are a must-have accessory for anyone who relies heavily on their mobile devices. These power banks are compact and portable, making them perfect for on-the-go charging. With a capacity of 4000mAh, they are capable of providing multiple charges to most smartphones and tablets.

How many volts can a power bank charge?

Total output current cannot exceed 9V 2A (18W). The power bank turns off automatically when the connected device reaches full charge. A lithium-ion battery with 4000mAh of capacity provides charging at maximum power draw for hours, making your devices ready when you need them. Status LEDs let you know how much battery capacity is left.

What is the capacity of a power bank?

The capacity of a power bank is measured in mAh (milliampere-hours). The higher the mAh, the more juice it can store and the larger devices that it can charge. 4000 mAh is a great capacity for a power bank as it can charge a typical smartphone 1-2 times and some tablets partially.
