

Power grid company energy storage announcement

Overview

Could a grid-side energy storage power station solve urban electricity problems?

"The grid-side energy storage power station is a 'smart regulator' for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a Google translation. This would "effectively solve the pressure of urban power supply and ensure the safe, stable and efficient electricity demand of the city," it added.

Will Tesla build a grid-scale battery plant in China?

Photographer: Carla Gottgens/Bloomberg via Getty Images Tesla has signed its first deal to build a grid-scale battery power plant in China amid a strained trading relationship between Beijing and Washington. The U.S. company posted on the Chinese social media service Weibo that the project would be the largest of its kind in China when completed.

Are startups repurposing EV batteries for grid-scale storage?

Startups have been taking note. Redwood Materials, which was co-founded by Tesla alum JB Straubel, in June added a new business line focused on repurposing used EV batteries for grid-scale storage.

How much power does a battery storage system have in 2023?

Capacity for global battery energy storage systems rose 42 gigawatts in 2023, nearly doubling the total increase in capacity observed in the previous year, according to the International Energy Agency. — CNBC's Arjun Kharpal contributed reporting.

Power grid company energy storage announcement
