

Price of solar module installation rails

Overview

What is spc-r001 solar mounting rail?

Factory direct Solar Mounting Rails SPC-R001 for solar panel installing projects, light in weight , quick and labor effective .

Which solar mounting rail should I Choose?

Depending on your location, there is an XR Rail to match. XR1000® is a heavyweight among solar mounting rails. It's built to handle extreme climates, spanning 12 feet or more for commercial applications. XR100® is the ultimate residential mounting rail. It supports a range of wind and snow conditions, while maximizing spans.

What are the different types of PV module rails?

Easy Installation PV module rails SPC-R001, well design for wide flexibility mounting structures . Anodized PV Modules Aluminum Rails (SPC-R001) for compatible mounting systems . - Factory direct PV module mounting aluminum rails, light-weight, anodized finished .

How many rails does a solarmount need?

The 156-inch SolarMount rail (part number 300011) is my best bet. Each row of modules requires two rails (top and bottom). This system, which has two rows of modules, requires four rails. Further, since I will be splicing two 156" rails in order to reach the required 294.6" rail length, I will need a total of eight 156" rails.
