

Price reduction for 10MW mobile energy storage containers used in bridges

Overview

Are energy storage systems reducing the cost of batteries?

The scale of the reduction suggests that in addition to the falling cost of batteries—BNEF's recent Lithium-ion Battery Price Survey found that battery pack prices fell 20% year-on-year to 2024, again the biggest drop recorded to date—energy storage system providers are working on cost reduction in other areas, Kikuma said.

Why are battery energy storage systems (BESS) costs falling?

A growing industry trend towards larger battery cell sizes and higher energy density containers is contributing significantly to falling battery energy storage system (BESS) costs.

Will China increase electrochemical energy storage capacity by 2030?

Furthermore, the government is also planning to drastically increase the electrochemical energy storage capacity by 2030. According to the State Grid Corporation of China, China is targeting electrochemical energy storage installed capacity of 30GW by 2025, and it will increase to 100GW in 2030.

How much does a turnkey energy storage system cost?

According to BloombergNEF's recently published Energy Storage System Cost Survey 2024, the prices of turnkey energy storage systems fell 40% year-on-year from 2023 to a global average of US\$165/kWh. The research firm said this was the highest annual drop since its survey launched in 2017.
