

# Rainproof solar panel roof

## Overview

---

What is a solar roof?

A solar roof or rooftop photovoltaic (PV) system is a setup where electricity-generating solar panels are mounted on the roof, utilizing the prime exposure of the rooftop to sunlight and creating one of the most environmentally friendly roofs possible.

What are solar panel roofing materials?

Solar panel roofing materials include solar shingles with photovoltaic cells, which eliminate the need for traditional solar panels that sit on top of the roof.

Which roof types are suitable for solar panels?

Asphalt shingles, metal, clay tile, rubber or standing seam roofs are suitable for solar panels. Learn more today and see how you can save!.

What is a modern residential solar panel roof?

A modern residential solar panel roof is a combination of architecture and home design with innovative solar panel technology. These roofs look great, blend well into the roof, and are highly effective.
