

Regulations on the Management of Base Stations of Telecommunication Operators

Overview

How do public telecommunications services operators provide their services?

Some Public Telecommunications Services operators, including mobile services operators, provide their services by installing radio base stations in buildings and on rooftops. 2.

What is a telecommunications system (radio base station)?

A telecommunications system (radio base station) may comprise an equipment room/shelter which is a structure for housing power supply and transmission equipment and/or antennae which are fixed to roof parapet of a building or attached to supporting frames projecting from the external wall of a building. 2.

Do radio base stations comply with OFTA requirements?

4. In addition to the compliance with the requirements of OFTA in respect of frequency emission and non-ionizing radiation (NIR) safety, the operators must ensure that their installations of radio base stations comply with the requirements of the Buildings Department (BD), the Lands Department (Lands D) and the relevant statutory town plan.

What is a radio base station reconfiguration procedure?

This procedure outlines the application procedure to be followed by the mobile services operators (hereinafter called the “operators”) for the reconfiguration of existing radio base stations NOT involving changes in the structural design and planning perspective of the parent building, and the change of land use.
