

Reset circuit breaker factory in New-Zealand

Overview

Can you reset a circuit breaker yourself?

Yes, you can typically reset a circuit breaker yourself if it has tripped due to an overload or a minor fault. However, if a breaker trips repeatedly, it indicates a more serious issue that requires professional attention.

How do I Reset my breaker?

Go to your electrical switchboard, usually located in a hallway, garage, utility room, or outside of the house in a meter board. Before resetting the breaker, turn off or unplug any devices, appliances, or lights connected to the circuit. This reduces the load and prevents the breaker from tripping again immediately.

What to do if a circuit breaker trips?

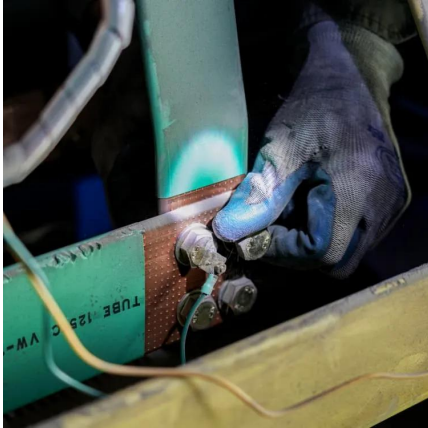

Turn off and unplug everything on the circuit, then reset the breaker. If it trips, turn off the breaker and call an electrician. Power off all electrical devices connected to the circuit breaker. Any device can create a demand on a single circuit and overload it, tripping the breaker off.

What should I do if my breaker is not working?

This should immediately restore power to the circuits that were disengaged. If the breakers have been reset and power is not restored to these circuits, contact an electrician as you may have more serious electrical problems that need to be investigated by a professional.
