

Romania develops energy storage projects

Overview

How much does Romania spend on energy storage projects?

Romania has allocated €80 million (\$87 million) under its national recovery and resilience plan (PNRR) for energy storage projects, which is expected to result in contracts for a total of 1.8 GW of capacity. “The projects are under evaluation and we anticipate the signing of the contracts in September,” the minister said.

Will Romania's natural gas storage facilities reach 80% capacity?

BUCHAREST, Oct 3 (Reuters) - Romanian natural gas storage facilities have been filled above a targeted 80% capacity and could reach 90% by Nov. 1, deputy Energy Minister Dan Dragan said on Monday. Unlike other countries in the region, Romania relies less on Russian gas.

How big is Romania's energy storage fleet?

From ESS News According to Romanian Minister of Energy Sebastian Burduja, the country’s energy storage fleet is expected to grow exponentially over the next couple of years. “In total, at the end of next year we should have storage capacities of at least 2,500 MW, and by 2026 we should exceed 5,000 MW.

What is the energy sector like in Romania?

Romania’s energy sector is key to its evolving economy and security policy. It has a diverse energy mix, including coal, natural gas, nuclear, hydroelectric, and renewable sources. The largest share of electricity production historically came from coal and natural gas, followed by hydroelectric and nuclear power.
