

Rooftop solar panel manufacturing

Overview

What is an industrial rooftop solar system?

An industrial rooftop solar system is specifically designed to meet the high energy demands of factories, warehouses, and large-scale production units. Unlike residential systems, rooftop solar for manufacturing units involves higher capacity, more complex wiring, and specialized components to support industrial-grade equipment.

What is rooftop solar for manufacturing units?

Unlike residential systems, rooftop solar for manufacturing units involves higher capacity, more complex wiring, and specialized components to support industrial-grade equipment. These systems are typically installed on the rooftops of production plants, fabrication units, or CNC machining workshops.

What is Rooftop Solar?

Rooftop Solar is a NABCEP (solar) Certified, licensed, bonded, and insured company. At Rooftop Solar, solar isn't just a job, it's a passion. Your system will be installed by the best installers in the industry and backed with an exclusive 30-year warranty. Rooftop Solar is the one creating clean renewable energy for you every moment the sun hits your panels.

Can a factory use rooftop solar?

A standard solar system for factories can range from 100 kW to several megawatts, depending on the site's connected load and power usage patterns. Key areas where rooftop solar for manufacturing units prove effective include running energy-intensive machines like chillers, air compressors, furnaces, extrusion lines, and injection molding systems.
