

# **San Marino AC uninterruptible power supply customization**

## Overview

---

Why should you use an uninterruptible power supply (UPS)?

Power interruptions can lead to data loss, hardware damage, and significant downtime. One effective solution to this problem is an Uninterruptible Power Supply (UPS). While many commercial UPS systems are available, creating your own can be a cost-effective and customizable option.

How to build a safe & reliable uninterruptible power supply?

Building a Safe and Reliable UPS Safety should be a top priority when you build your homemade uninterruptible power supply. Follow these safety tips: Use Quality Components: Invest in high-quality batteries, inverters, and other components to ensure reliability and longevity.

What do you need to make an uninterruptible power supply?

For prototypes, you need a soldering iron, copperclad boards, wires, solder, flux, and the components listed later. For measurement, you need a multimeter, an oscilloscope, and a thermometer (or thermal camera). Step 1: What Is an Uninterruptible Power Supply?
