

Sarajevo solar air conditioner silver decoration turns yellow

Overview

Why do air conditioners turn yellow?

Yellowing is a very common occurrence in ageing air-conditioners. But what causes them to turn yellow?

The main reason would be oxidation, be it from exposure to UV rays, heat, or even sulfurization from air pollutants. These would make fundamental changes within the molecular structure of the plastic which eventually results in yellowing.

Can a yellow air conditioner be reversed?

Once the plastic has turned yellow, it is not possible to reverse the process. Therefore, if you wish to avoid the yellowing process, do keep your air-conditioners away from UV exposure, especially if sunlight enters through a window during the day. How do I remove yellow stains from my air-conditioner?

.

Why does plastic turn yellow?

The main reason would be oxidation, be it from exposure to UV rays, heat, or even sulfurization from air pollutants. These would make fundamental changes within the molecular structure of the plastic which eventually results in yellowing. Once the plastic has turned yellow, it is not possible to reverse the process.

Why is my MERV 13 AC filter yellow?

The type of AC/HVAC filters can actually be the reason why it is yellow. MERV 13 AC filters can be yellow when first purchased. This is their correct color, and is nothing to be concerned about. While other types of air conditioner filters turn yellow when it is time to have them replaced. A great example of these are the Colorfil filters.
