

# **Saudi Arabia Remote Solar Power System**

## Overview

---

Is Saudi Arabia a solar power hub?

Saudi Arabia's vast and arid regions are considered a great hub for solar potential. Rich in sunlight and gas, the Kingdom is moving toward diversifying its domestic power supply, and companies such as Saudi Aramco have been using PV panels as a renewable energy source since the 1980s.

How many wind and solar projects are there in Saudi Arabia?

The Saudi energy minister, Abdulaziz bin Salman Al Saud, says a team of experts have conducted a geographic survey to identify 1,200 sites for wind and solar projects across Saudi Arabia.

What is Saudi Arabia's first solar power plant?

Saudi Arabia's first solar power plant was commissioned on October 2, 2011, on Farasan Island. It is a 500 kW fixed tilt photovoltaic plant. Given that the cost of solar projects decreased by roughly 90 percent in the 2010s, petrostates in the Middle East have raised their ambitions.

Can Saudi Arabia supply its electrical needs solely with solar power?

Saudi Arabia has the potential to supply its electrical needs solely with solar power. [citation needed] As the largest oil producer and exporter in the world and one of the largest carbon dioxide producers Saudi Arabia would set an important precedent in renewable energy by shifting to solar power.

## Saudi Arabia Remote Solar Power System
