

Scalable Procurement of Solar Containers in France

Overview

How is France preparing for a solar project?

To meet these targets, France will rely heavily on structured tendering procedures. Beginning in the first half of 2025, the government plans to launch two annual tenders for ground-mounted solar projects, each awarding 1 GW of capacity. In parallel, three rooftop solar tenders per year are scheduled, with each round targeting approximately 300 MW.

How many solar panels are installed in France in 2023?

Total Installed Capacity: In 2023, France installed 4.0 GW of new PV capacity, bringing the cumulative total to 24.6 GW. This includes 2.5 GW of decentralized PV and 1.45 GW of centralized PV.

What challenges are facing France's solar landscape?

With ambitious targets set for 2030 and beyond, the country is ramping up ground-mounted and rooftop tenders, but faces critical headwinds in permitting, land availability, and price volatility. This article outlines key policy shifts, market segmentation, tender outcomes, and systemic challenges shaping the French solar landscape.

How many solar tenders are there per year?

In parallel, three rooftop solar tenders per year are scheduled, with each round targeting approximately 300 MW. Complementing these will be an annual 500 MW technology-neutral auction, open to solar, onshore wind, and hydropower projects, encouraging diverse renewable deployment.
