

School uses off-grid solar container single-phase installment payment

Overview

What happens when a school uses a solar system?

When a school uses a solar system, the building continues to use electricity from the utility when its power demands exceed the solar system's production. At the end of the billing cycle, the school's electric bill reflects the total energy consumed minus the electricity that was produced by the solar system.

How many schools currently use solar energy?

Nearly 5,500 schools currently use solar energy systems. This number will continue to grow rapidly as solar panel efficiencies improve and manufacturing costs decline.

Why is solar power successful in K-12 schools?

A fundamental reason for solar power's success in K-12 schools is the wide range of benefits offered to stakeholders. Nearly 5,500 schools currently use solar energy systems and that number will continue a rapid ascent as solar panel efficiencies improve and manufacturing costs decline.

Is solar power a good choice for schools?

Solar power is the best way for schools to shine today, with an estimated 4 million students attending schools with some form of solar power application. With the latest advancements in technology and quicker return on investment, solar energy is now a practical and environmentally friendly option for schools.
