

# Shopping mall uses Chad solar-powered container off-grid type

## Overview

---

Why do South Africa's shopping malls use solar panels?

In South Africa, where much of the power produced is from fossil fuels, installing solar panels and going green promoted an eco-friendly business. Solar panels guarantee free electricity for up to 25 years if well maintained. By transitioning to solar energy, shopping malls play a pivotal role in reducing the city's carbon footprint.

Can a rooftop solar system carry a mall's full load?

"The rooftop solar system can carry the mall's full load during the day, and the BESS is sized to ensure autonomy during load shedding and even unexpected grid failures using smart load management and diesel generation," said Charl du Plessis from EP Power.

Do shopping malls need solar panels?

Solar panels reduce a shopping mall's reliance on traditional grid energy, leading to lower electricity bills and long-term financial benefits. Additionally, shopping malls can take advantage of tax breaks, which can significantly offset the initial investment cost of the solar panel installation.

Are solar energy containers a beacon of off-grid power excellence?

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into the workings, applications, and benefits of these revolutionary systems.
