

Solar Air Conditioner Types

Overview

What are the different types of solar-powered air conditioners?

The three main types of solar-powered air conditioners are direct current (DC) solar air conditioners, alternating current (AC) solar air conditioners, and hybrid solar air conditioners. Direct and alternating current refers to the way energy flows: DC only flows in one direction, while AC changes direction often.

What are the best solar-powered air conditioners?

Whether you want to go entirely off-grid or invest in a smaller solar air unit, SolAir World has some of the best solar-powered AC solutions available. The company offers hybrid solar air conditioners as well as 100% off-grid systems.

What is a solar air conditioner?

Unlike other forms of renewable energies, solar energy has various applications, one of which is a solar air conditioner. A solar air conditioner uses solar energy to function. In an era of sustainability, solar AC is a revolutionary invention. Solar ACs contribute to a sustainable environment and significantly lowers energy bills.

How much does a solar air conditioner cost?

Generally, solar-powered air conditioners can cost around \$2000 (₹1,59,791) pre-installation. The total costs, including installation, can go up to around \$5000 (₹3,99,477). However, you need to check with the manufacturer to find out the actual cost. Prices keep fluctuating in the solar market.
