

Solar container battery air transport in London

Overview

How does solar energy logistics work?

Using our global network of air and sea carriers, we design a solar energy logistics solution that transports your solar panels or solar panel components efficiently and safely to their destination.

Why do you need a battery transport service?

Batteries are classified as hazardous materials – and transporting them is a delicate business. We have the global presence and extensive local expertise to deliver batteries safely and on time, wherever needed. Whether by air, sea or road, our battery transport solutions comply with all international norms and regulations.

How does DHL transport used and defective batteries?

DHL safely transports used and defective batteries from dealerships and distributors to aftermarket warehouses and battery suppliers in line with all national, regional and local regulations.

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.
