

# **Solar container lithium battery pack for drift car**

## Overview

---

What is a 20ft container energy storage system?

It also includes automatic fire detection and alarm systems, ensuring safe and efficient energy management. The 20FT Container 250kW 860kWh Battery Energy Storage System is a highly integrated and powerful solution for efficient energy storage and management.

What is a 20ft container 250kW 860kwh battery energy storage system?

Equipped with automatic fire detection and alarm systems, the 20FT Container 250kW 860kWh Battery Energy Storage System is the ultimate choice for secure, scalable, and efficient energy storage applications. Email us with any questions or inquiries or use our contact data.

How do I charge my drift leisure battery?

You can charge your Drift Leisure battery in a number of ways; The recommended voltage for charging a lithium leisure battery is between 13.5V - 13.8V Float to 14.2v - 14.4V Bulk. We recommend Victron equipment is set to a Float of 13.5V and 14.2V Bulk. Going above this range for significant periods of time can damage the battery.

Can I Lay a drift battery on its side?

There is a full version of the Drift manual on the website here. Can I lay my Drift on its side?

Yes, your Drift battery can be lay on its side, in fact, you can lie a Drift battery in any configuration you wish. All we recommend is that you keep the terminals clear and clean.
