

# **Solar container outdoor power for night lighting**

## Overview

---

What are solar lighting fixtures for shipping container?

Sun-In-One LED lighting fixtures for shipping container solar lighting kits provide you with enough light to get equipment or supplies out of the container, up to high-quality lighting, and allow you to use the shipping container as a workshop and have enough light to do fine detailed work.

What is a shipping container solar lighting kit?

Shipping Container Solar Lighting Kits provide lighting in shipping containers and storage areas with 2 days of battery technology for cloudy, rainy, or snowy days with 8 hours per day of run time.

How do shipping container lights work?

They are mounted on the twist-tight lock with magnets to provide external lighting around the Shipping Container. We also offer vapor-tight and explosion-proof LED container lights and LED Floodlights. Shipping containers are not very large spaces with relatively low ceiling heights.

How many lights do you need in a container?

The number and type of lights are all based on your actual lighting needs inside the container. If you are using the containers just for general storage and do not have to read the fine print on items, then one or two fixtures might be all you need. If it's a more significant 40 FT container, 3 or 4 fixtures might be the solution.
