

# Solar module enterprise export

## Overview

---

How many solar modules does China Export in 2022?

This is equivalent to about 84 GW of modules, more than half of China's total module exports in 2022. According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93GW of PV modules, an increase of 13% compared to 207.99GW in the same period in 2023. Comparison of Chinese PV module exports in 2023 and 2024. Source InfoLink.

What is China's photovoltaic export value?

The export value, which includes photovoltaic products such as silicon wafers, cells and modules, reached about \$43 billion during the first 10 months, the China Photovoltaic Industry Association said on Friday.

Did China Export more solar cells in the first 10 months?

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022. While the value of solar product exports from China was flat in the third quarter, volumes rose month-on-month, thanks to lower module prices, he said.
