

Solar power generation system in Democratic Republic of Congo

Overview

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.

Is there an interconnected national power transmission network in the DRC?

There is no interconnected national power transmission network in the DRC, which is instead structured into three independent interprovincial grids. The western and southern grids are connected by a High Voltage Direct Current (HVDC) line. The eastern grid is more remote and will not be connected.

How will the DRC meet the Electricity challenge?

The DRC aims to connect 32% of the country to electricity by 2030. Meeting this challenge will require co-ordinated efforts from various stakeholders, supportive policies and regulations, and technical assistance support to prospective projects in order to attract investments.

Solar power generation system in Democratic Republic of Congo

[Congo Republic solar photovoltaic electricity](#)

Kolwezi Solar PV Park is a 100MW solar PV power project. It is planned in Katanga, Democratic Republic of the Congo. According to GlobalData, who tracks and profiles over 170,000 power ...

[ENERGY PROFILE Democratic Republic of the Congo](#)

Additional notes: Capacity per capita and public investments SDGs only apply to developing areas. Energy self-sufficiency has been defined as total primary energy production divided by ...

[DR Congo Plans 63-MW Hydro Plant, Solar Projects in Kwango](#)
