

Solar power solutions factory in Kyrgyzstan

Overview

Why is China building a 100 MW solar power plant in Kyrgyzstan?

Kemin, Kyrgyzstan — In a significant step toward enhancing Kyrgyzstan's energy infrastructure, China has begun construction of a 100 MW solar power plant in the city of Kemin, located in the Chuy Region. The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation.

Will Kyrgyzstan implement two solar power plant projects?

As part of the International Energy Investment Forum in Vienna, the Ministry of Energy and the Ministry of Economy and Commerce of Kyrgyzstan signed an agreement with the International Finance Corporation (IFC) on implementation of two solar power plant projects. The press service of the Ministry of Economy reported.

What is Kyrgyzstan's solar project?

The project underscores Kyrgyzstan's commitment to sustainable energy development and environmental preservation. The solar plant, once operational, is expected to generate 155 million kWh of electricity annually, contributing to the country's energy needs while reducing reliance on fossil fuels.

What is a solar power plant project?

The project aims to increase the use of renewable energy potential to meet growing electricity demand. At the first stage of cooperation, IFC helped conduct a comprehensive analysis and structuring of a pilot project of a solar power plant with a capacity of 100-150 megawatts in Kochkor district of Naryn region.
