## Overview

---

What is a solar lighting system?

A solar lighting system refers to an eco-friendly lighting solution that harnesses power from sunlight through photovoltaic (PV) panels. It captures and converts sunlight into electricity, which is then stored in batteries for use when needed, such as during the night or on cloudy days.

What is the wattworks DC LED lighting & solar PV power station?

The WattWorks DC LED Lighting and Solar PV Power Station will provide lighting and power to a remote building that does not have access to utility power. The WattWorks system is composed of several major components including DC LED lights, Sequent Power DC Load Center with Battery Bank, and solar PV panels.

How does a solar lighting system work?

Solar lights operate by utilizing photovoltaic (PV) cells, which absorb the sun's energy and create an electrical charge within the panel. This charge travels through wires connecting the solar cell to a battery, converting and storing the energy as chemical energy for future use.

Where can solar lights be used?

Here are some examples of where solar lighting systems can be used: 1. Solar Floodlights: Utilizable during power cuts or in emergency situations, these potent solar lights can also be employed in home workshops, garages, yards, and businesses needing robust illumination or extra security. 2.
