

Solar project inverter warranty period

Overview

How long does a solar inverter warranty last?

That's why understanding your solar inverter warranty is so important. The SolarEdge inverter warranty covers string inverters for 12 years by default, with the option to extend coverage up to 20 or 25 years depending on the model. These inverter warranty periods help protect your investment by covering potential defects or premature failures.

How long is a string inverter warranty?

The warranty length for a typical string inverter can vary depending on the manufacturer and the specific model. Generally, the warranties for string inverters in the solar industry are as follows: **Standard Warranty Period:** Most string inverters have a standard warranty period ranging from 10 to 12 years.

Should I extend my SolarEdge warranty?

If you have a string inverter system, extending your SolarEdge warranty may be a smart investment. Most standard string inverter warranties last between 5 and 12 years, and inverter failure during this period can result in complete system shutdown, leading to lost solar production and unexpected costs.

How long does a solar panel warranty last?

Solar panel manufacturers guarantee their products are free from material and workmanship flaws. Their warranty typically lasts for 10 to 25 years, offering extended coverage. **Common Terms:** Manufacturer warranties often cover defects in materials and workmanship, ensuring that the solar panels and inverters meet specific quality standards.
