

Spanish container emergency power generation equipment

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is the largest civil engineering project in Spain?

The brand new “12 de Octubre” Hospital in Madrid is considered the largest civil engineering project currently underway in Spain. It will have more than 1400 beds and breaking-ground ICU technology. The building's structure and façade were completed in early 2023.

Why should you choose a containerised generator?

Containerised Generators are trusted across industries where reliability and resilience are non-negotiable, such as Healthcare and Rail infrastructure. Every unit can be tailored to your project with options for fuel type, noise attenuation, and space-saving layout.

How many Mobile Ops units are there for mega-yachts?

It has two mobile OPS units for mega-yachts with supply from 4 MW to 6 KW (since 2014) and from 3.5 MW to 6 MW (since 2020). The Port participates in the 'European flagship action for cold ironing in ports' (EALING), an EU initiative to deploy OPS solutions in seaports and achieve a standard for electrical connection to ships from the dock.

Spanish container emergency power generation equipment
