

Sunroom solar Outdoor Site Energy Installation

Overview

Should you install a sunroom?

Installing a sunroom is an exciting process full of opportunities to completely customise your new space. Sunrooms are also an excellent way to infuse light into your home, creating an open, inviting space for living and relaxation. Plus, depending on what you're prepared to pay for sunroom costs, they can be designed to your exact needs and style.

Can a sunspace be used as a heater?

If its primary function will be heating, a sunspace with sloped glazing, few plants, little thermal mass, and insulated, unglazed end walls will get very hot on sunny winter days. In practice, sunspaces are rarely built to serve only as heaters, because there are less expensive ways to provide solar heat.

Should you add a sunspace to your home?

Before you decide to add a sunspace to your existing home or new house design, remember that energy efficiency is the most cost-effective strategy for reducing heating and cooling bills. Choose building professionals experienced in energy-efficient house design and construction and work with them to optimize your home's energy efficiency.

Can a sunspace be used as a greenhouse?

In practice, sunspaces are rarely built to serve only as heaters, because there are less expensive ways to provide solar heat. If the space will be a greenhouse, plants need fresh air, water, lots of light, and protection from extreme temperatures. Greenhouses consume
