

Supercapacitor module manufacturer in Amsterdam

Overview

What is a 56v supercapacitor module?

Maxwell Technologies 56V series of ultracapacitor / supercapacitor modules provides power during dips and sags in the main power source. In longer-term outages, the modules provide transition/bridge power to a longer-term backup source, such as a motor-generator or fuel cell.

What is a standardized ultracapacitor module?

The standardized ultracapacitor modules consists of single cells in series or parallel connection for a diverse range of energy storage, transportation, automotive, UPS, renewable energy, telecommunication and many more applications operating under harsh temperature, humidity and vibration conditions. Applications.

Which supercapacitor module is based on skeleton?

Based on Skeleton's industry-leading supercapacitors, offering unparalleled power. The SkelMod 51V 177F supercapacitor module is the only rail-certified supercapacitor module on the market. Based on Skeleton's supercapacitors: Reliable engine starting for diesel engines in any weather conditions.

Does AEP offer standardized Maxwell ultracapacitor modules?

In applications that demand higher energy and/or power, more than one ultracapacitor is required. To deliver the required energy and/or power, AEP offers standardized Maxwell ultracapacitor modules. Standardized Maxwell Ultracapacitor modules Maxwell's ultracapacitor modules are available in 5V, 16V, 24V, 48V, 56V, 75V, 90V, 125V, 160V and 240V.
