

The Most Energy PV Site in the Bahamas

Overview

The Thomas A. Robinson National Stadium 925kW Solar PV Carport Power Plant will displace 310,000 litres of diesel per year, saving the government US\$350,000 and offsetting 856 tonnes of carbon dioxide annually. Does the Bahamas need a solar power plant?

The need to protect the tourism industry is an added incentive. In 2023, the Bahamas opened the first of two solar plants in Grand Bahama. The two solar plants are expected to cut more than 5,000 tons of CO₂ emissions per year. The government pledged to generate 30 percent of the country's energy from renewable sources by 2033.

Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all power generation with a 99% share of electricity production.

Who owns the power plants in the Bahamas?

The government-owned public Bahamas Electricity Corporation (BEC) has owned the oil-fueled power plants that have supplied the majority of the nation's electricity demands since its authorization under the Electricity Act of 1956.

When did electricity come to the Bahamas?

The Electric Light Act brought electricity to the Bahamas in 1907. The Bahamas Power and Light Company (BPL; formerly Bahamas Electricity Corporation, BEC) supplies approximately 85 percent of the nation's electricity needs and operates on all the nation's major islands except Grand Bahama.

The Most Energy PV Site in the Bahamas

[Site identification and power production for floating ...](#)

Apr 1, 2025 · Potential sites for floating photovoltaic (FPV) plants are identified in The Bahamas using a modified HydroLAKES database supplemented by satellite imagery and numerical ...

[Bahamas Boosts Renewable Energy with New 132-MW Solar ...](#)

Apr 5, 2025 · Get the latest Bahamas energy news: A landmark Power Purchase Agreement will deliver a 132-MW solar plant, cutting electricity costs and securing a sustainable future.

[Landmark Renewable Energy Project in The Bahamas Begins ...](#)

Apr 30, 2024 · NASSAU, The Bahamas - Fairfield Solar Plant begins operations today as one of the two solar plants in Grand Bahama developed by Lucayas Solar Power Ltd. Fairfield is the ...

[Mapping coastal sites for floating photovoltaics in The Bahamas](#)

Jul 11, 2025 · As one of the most mature forms of renewable energy, solar energy has been widely adopted globally, but its high demands for extensive areas of land limit its usage for ...

[Renewable energy systems in The Bahamas grow by 13.6 ...](#)

May 2, 2025 · Most of the renewable energy systems in The Bahamas are photovoltaic (solar) installations, with residential and commercial properties increasingly adopting solar solutions

...

The Bahamas set to aggressively expand its use of solar energy ...

The Government's National Energy Policy (NEP) is on track to expand its solar energy capacity to 30% of total energy production by 2033. This goal is supported by the Inter-American ...

[Bahamas solar power: Stunning 2024 Project Announced](#)

Nov 1, 2025 · These efforts are part of a long-term strategy to diversify the country's energy mix and reduce its dependence on imported fossil fuels. Solar Energy: A Cleaner, More ...
